RE: VETERAN S HOME PROJECT
Regarding High Speed Wireless Internet
Attn: Janet Cornish

Jefferson Broadband (JB), is a wireless highspeed internet service provider headquartered in Boulder, Montana. Established in 2003, JB is a 501(C)4 community benefit non profit corporation that serves the communities of Boulder, Basin, Boulder valley, and the north communities to Montana City (see attached IRS Letter of Determination).

JB wishes to offer their interest in, and service to, the Veteran s Home Project proposed to be built in Boulder. JB suggests that the Home would be best served if the building plan includes the necessary infrastructure to accept a wireless internet signal; however, if not, service would still be available through other means.

The JB president and technician is available to answer any questions: Tom Colella 406 329-6365 or tom.colella@jeffbb.net
